

Thugged out template

Contributed by JoomlaThug
Friday, 13 July 2007

Ok, I'm kinda feeling this carbon template so I'm gonna just go ahead and roll with it. I'm still needing some nice thugged out icon set to go with it though. So I appreciate it if you got the time.

In search of a thugged out template to go along with this joomlathug.com essence. I've searched through the entire joomla.de template gallery and nothing. I've also search searched through some template club sites and managed to find find nothing that says "this is the joomlathug site".

Some specifics:

- dark surroundings

- light/white where there are things to read (menus/content)

- positions - she said 69, I said 68 and I owe you one

- fly, fresh, dope, hot, slamming, off the hook, shite like that.

- a thugged-out icon set wouldn't be bad

Please keep in mind at all times that a "thug" is not a "gangsta". Many find it hard to see the difference here thanks to hip hop. But its just not the same son.
